

DESCRIPTION

The Covers CVC*2RS are designed to hold Hydronine make 2 port slip-in cartridge valves model CV*** in the cavities machined as per ISO 7368, and are meant to provide dual pressure Pilot operated Relief function, using combination of a Slip-in Cartridge having a poppet ratio of 1:1, and two Relief valves, selectable by means of energizing a solenoid valve mounted on it. Please note that difference in the pressure setting between the 1st Relief valve and the 2nd Relief valve (as marked in the circuits below) must be minimum 10 bar; 2nd Relief valve being set at lesser pressure of the two. By using a Double solenoid valve as shown in the circuit, an additional unloading function can also be achieved by the cover.

SECTION

For unloading normal position

Hydraulic Symbol

TECHNICAL SPECIFICATIONS

Mounting interface	: As per ISO 7368
Working pressure	: 350 bar.
Hydraulic medium	: Mineral oil.
Temperature range	: -20°C to + 80°C.
Viscosity range	: 10 cSt to 380 cSt.
Fluid cleanliness required	: ISO 4406 20/18/15 or better.

UNIT DIMENSIONS

Cover mounting interface as per ISO 7368.

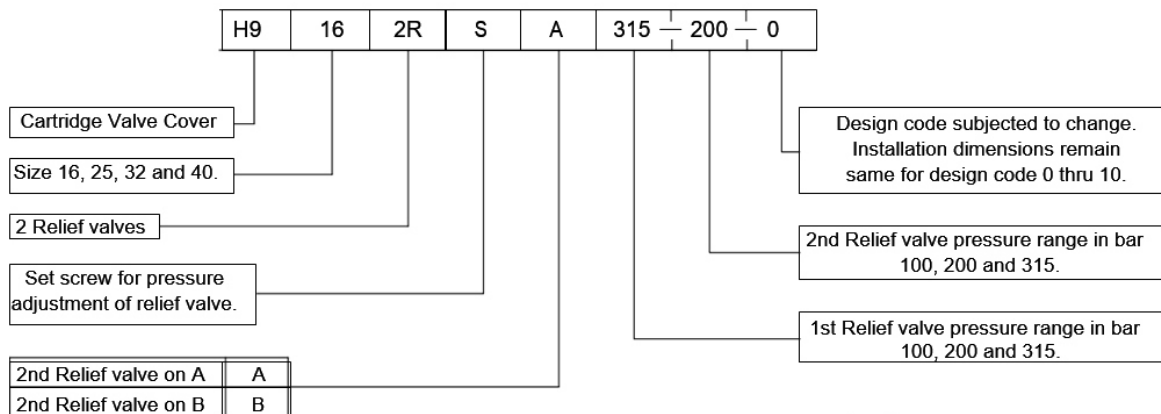

Notes:

1. Cover fixing S.H.C Screws are OUT OF SCOPE OF SUPPLY.
2. Mounting interface for Soln. D.C.V as per ISO 4401-03-02.
