

## DESCRIPTION

The Covers H9-LC\*S are designed to hold Hydronine make 2 port slip-in cartridge valves in the cavities machined as per ISO 7368 . It also meant to connect port C of the Cartridge to one of the two pressure sources, brought to its port X and port Z1 . Automatic selection of higher source pressure and isolation of these pressures from one another is done by the built in Shuttle valve in the cover.

Application of pressures at port C isolates port A of the cartridge from its port B.

To open the passage in the cartridge, it is essential to depressurize both the input sources provide to the cover.

The resultant pressure source acting on the port C is also available at port Z2 provided on the cover.

## SECTION

## HYDRAULIC SYMBOL

## TECHNICAL SPECIFICATIONS

Mounting interface	: As per ISO 7368
Working pressure	: 350 bar.
Hydraulic medium	: Mineral oil.
Temperature range	: -20°C to + 80°C.
Viscosity range	: 10 cSt to 380 cSt.
Fluid cleanliness required	: ISO 4406 20/18/15 or better.

### UNIT DIMENSIONS

Dimensions in mm.

**Notes:**

- Cover fixing S.H.C Screws are **OUT OF SCOPE OF SUPPLY.**
- Mounting interface for Soln. D.C.V as per ISO 4401-03-02.

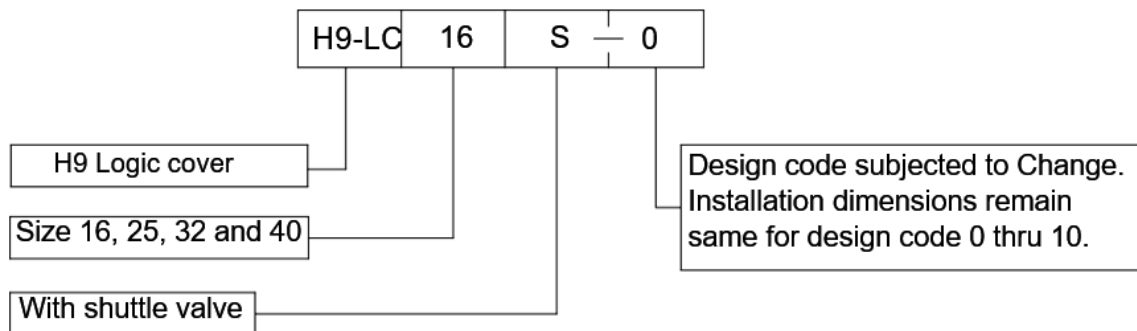

Cover mounting interface as per ISO 7368.
